2013 Membership dues, if not already paid are due now

We would like to thank the following members for their donations to PMCM: Wilson Born, Jeffrey Ferrand, Nelson Aspen, Richard Kirka

EDITOR'S NOTES: Those of you who were able to make it to Chicago for the CPMX had a great time. There were a number of Michigan participants, including Dan Freeland, Bill Rau, Larry Falater, Lee DeGood, Joe Peruski and Son, Barry Minster and yours truly to name a few. Next issue I'll be reporting on the Central States Show in Chicago and hope to run into some of you there. I have started a new collection recently and am now chasing early Detroit Obsolete Banks along with all my other distractions. I also want to alert you that our hard working President, Dr. Karl Mark Pall is stepping down for health reasons. He will remain on the board but feels that he cannot properly discharge his duties due to ongoing health issues. We will select a new President at the Fall meeting and wish Karl Mark Paul well in health and collecting endeavors.

OUR COVER: This month's cover features a view of the 1838 City of Detroit waterfront. There were approximately 9 different currency issuing Obsolete banks in early Detroit before the advent of the National Banks. After legislation taxing the currency in circulation for these banks in 1858 they all pretty much gave up the practice. Many of the banks were quite fraudulent in their currency issuing methods, without any gold or silver backing them, for instance and refusing to honor them when they were turned in for payment. This bank did not suffer from, a dishonesty taint.

CLUB NEWS: The Currency Club of Chester County continues to send me their newsletter. As a member club they have been very supportive over the years. Joyce Aspen, their Secretary does a great job on these monthly emissions. Her Newsletter by itself would justify joining this Pennsylvania Club. Future club programs include: Jim Mason on May 16th on community currency, June 20th features Dave Stitely on Fractionals. Steve Perakis will talk on the First Bank July 18th. If you live any where near this club...Join them!

SPECIAL APPEAL: As you can see the magazine is getting pretty skinny. How about sending me an article on your passion. I'll be happy to edit it if you feel that is necessary. There have been some interesting articles the last few issues. Help the club and share your knowledge. My email is in the front of the magazine along with my address

The following members have received either an email or post card stating their 2013 PMCM dues were past due. Please send \$12.00 to PMCM, PO Box 195, Mayville, MI 48744 to receive future Rag Pickers:

PRESIDENT'S COLUMN:

As mentioned elsewhere, Dr. Karl Mark Pall is stepping down for health reasons. We all wish you well Karl. Thank you for your service to the club.

2006 \$1 SOI NOTE PRODUCTION: As of 1-31-2013 by Greg McNeal

The Bureau of Engraving and Printing (BEP) replaced some of the I-10 Intaglio (I-10) presses with Super Orloff Intaglio (SOI) presses in Washington, DC (DC) during 2007. A complete line consisting of a press for the back and a press for the face printing was replaced at the same time. The SOI press had the potential to increase production by 56% due to the larger sheet size that it could handle. The I-10 press used a 32 note sheet while the SOI press could use a 50 note sheet. Both

presses could run 10,000 sheets per hour. But, with the larger sheet size, the SOI press could produce 500,000 notes per hour vs. 320,000 notes on the I-10 press. Currently the SOI presses are running 32 subject sheets and all 2006 Series sheets were 32 subject sheets. Other differences include: the SOI press has a better integrated inspection system with ten times the resolution of the I-10 press, it has the capability of printing one additional color, and it has a more precise ink control which helps save costs by reducing ink usage. The SOI press also features a four-pile delivery system versus a two-pile on the I-10 press which reduces spoilage by having less weight (pressure) on the bottom sheets of each pile. And, the SOI press uses three printing plates vs. four printing plates for the I-10 press. During the initial testing, adjustments had to be made due to the differences in the two presses. An SOI line was installed in the Fort Worth, TX (FW) facility during 2008. The earliest \$1 2006 Series SOI notes were printed in DC during February 2008. FW started printing \$1 2006 Series SOI notes during September 2008.

Series 2006 \$1 notes were being printed in both facilities when the SOI presses were installed. \$1 sheets were being printed on both the I-10 and SOI presses as demand required. Unlike the \$20 SOI note which had a larger face plate number, there was not a noticeable difference in the \$1 SOI note. This made the identification of \$1 notes printed using the SOI press difficult. Collectors were identifying \$1 SOI notes by the three plate number rotation for the face plate and back plate since this was the only noticeable difference in the production. This presented a challenge because the only way to identify if there was a three plate vs. four plate rotation was to find new notes in consecutive number order. With the help of several collectors and dealers, a list of confirmed SOI plate numbers was compiled for both DC and FW. Plate numbers from new packs of both I-10 and SOI were identified and recorded. As face and back plate numbers were identified, they were added to the list as confirmed SOI or confirmed I-10 numbers. The confirmed list of numbers made it possible to identify other numbers that were associated with either I-10 or SOI presses. Associated plate numbers were identified when an unidentified number was found on a note with a confirmed plate number. The key was to find a note which contained a confirmed face or back plate number. Over time, after reviewing thousands of \$1 2006 Series notes and with help from collectors and dealers, a list of face and back plate numbers was compiled for both facilities.

Currency Overprinting Processing Equipment and Packaging (COPE-Pak) is the third printing process. Stacks of 10,000 sheets (2 half sheets stacked side by side) from both the I-10 and SOI presses are fed into the COPE-Pak presses. Since a normal Run consists of 200,000 sheets or 20 stacks consisting of 10,000 sheets, there is potential for a Run to contain notes from both I-10 and SOI presses. Using the list of confirmed and associated face and back plate numbers for both printing facilities, Blocks and Runs were identified as being printed on either the I-10 line, SOI line or a mixture of both. This possibility has left some Runs with a short production of SOI or I-10 notes.

It appears that after the FW facility installed and started using the SOI presses in September 2008, all production of the \$1 note shifted to FW with the exception of the New York District which continued being printed in DC until May 2009. This shift in production made it possible for a District to have notes for the same Block printed in both DC and FW. As of this writing, only one Block has been identified as having SOI notes from both facilities. That Block is from Richmond and it is E/E. SOI notes have been identified from Run 1 printed in DC and Runs 4, 7, 8, 9, and 15 printed in FW.

Since both the I-10 and SOI printing presses were producing \$1 notes at the same time in both facilities, there is potential for a hybrid note to be produced. A hybrid note is defined as containing a plate number from one press on the face and the other press on the back. However, since the BEP has gone to great lengths to keep the sheets separate, as of this writing, none have been confirmed. It is believed that due to the adjustments that the BEP made for the SOI presses, the sheets had to be kept separate and printed on the same type of press (either SOI or I-10). These adjustments made it impossible for a sheet printed on the I-10 press to run correctly on the SOI press and visa-versa. There have been two reports of notes with hybrid numbers but they have not been confirmed. These notes had DC face plate number 236 and back plate numbers 198 and 207. The face plate number being from an SOI press and the back plate numbers from an I-10 press. The numbers are from block F/J Run 7 printed during September 2008. The Run contains a face plate number 226 which could indicate that the 236 number should have been 226 but was reported incorrectly. The other report is a FW note from block E/I run 4 printed during October 2009. It contains face plate number 157 (SOI) and back plate number 148 (I-10). The face

plate number is completely foreign to the Run and month of production making it suspect.

The following is a list of confirmed and associated \$1 2006 SOI face and back plate numbers as of this writing.

Washington, DC

Face Plate Numbers:

120, 121, 122, 124, 172, 173, 174, 175, 235, 236, 237, 238, 239, 240, 242, 246, 251, 252, 253, 254, 255, 256, 257, 258, 259, 260, 273, 274, 277, 280, 282, 292

Back Plate Numbers:

125, 126, 129, 131, 133, 134, 135, 136, 137, 138, 139, 140, 141, 183, 186, 187, 240, 242, 243, 285, 286, 287, 290, 293, 295, 297, 298, 299

Fort Worth, TX

Face Plate Numbers:

135, 136, 138, 139, 141, 142, 143, 144, 147, 148, 149, 150, 151, 156, 157, 160, 161, 165, 166, 167, 168, 169, 170, 171, 172, 173, 190, 191, 196, 220, 222, 223, 224, 231

Back Plate Numbers:

82, 101, 102, 103, 111, 112, 114, 116, 118, 120, 121, 122, 125, 127, 129, 130, 134, 135, 136, 153, 154, 155, 159, 160, 161, 178, 179, 180, 181, 182, 183

The following list identifies Blocks which contain SOI notes as of this writing. If a Block is not listed, all identified notes were from the I-10 press. To arrive at the percentage for SOI, I-10 or Unknown, the Block was divided into Runs and stacks. A full Block contained 15 Runs. Each Run contained 20 stacks of 10,000 sheets. The percentages shown represent the percentage of stacks based on the number of Runs in the Block. A full Block would contain 300 stacks of 10,000 sheets. The sheet number was identified for the notes observed and placed into the appropriate stack. If the note was an SOI note, the stack would be counted as an SOI stack and visa-versa for the I-10 notes.

| Block | Where Printed | Serial # Range | % SOI | % I-10 | % Unknown |

| L / N | FW | 00000001-96000000 | 51% | 32% | 17% |
| L / P | FW | 00000001-96000000 | 24% | 56% | 20% |
| L / Q | FW | 00000001-96000000 | 3% | 78% | 19% |
| L / S | FW | 00000001-32000000 | 2% | 85% | 13% |

As you can see from the table above, there are four blocks which contain less than 1% SOI notes. They are D/C and E/B from DC and F/L and K/D from FW. There has been only one SOI note reported for D/C, E/B and F/L blocks and only two notes for the K/D block. The D/C note is from Run 11 printed during July 2008. The E/B note is from Run 5 printed during April 2008. The F/L note is from Run 4 printed during September 2008. And, the K/D notes are from Run 14 printed during October 2008.

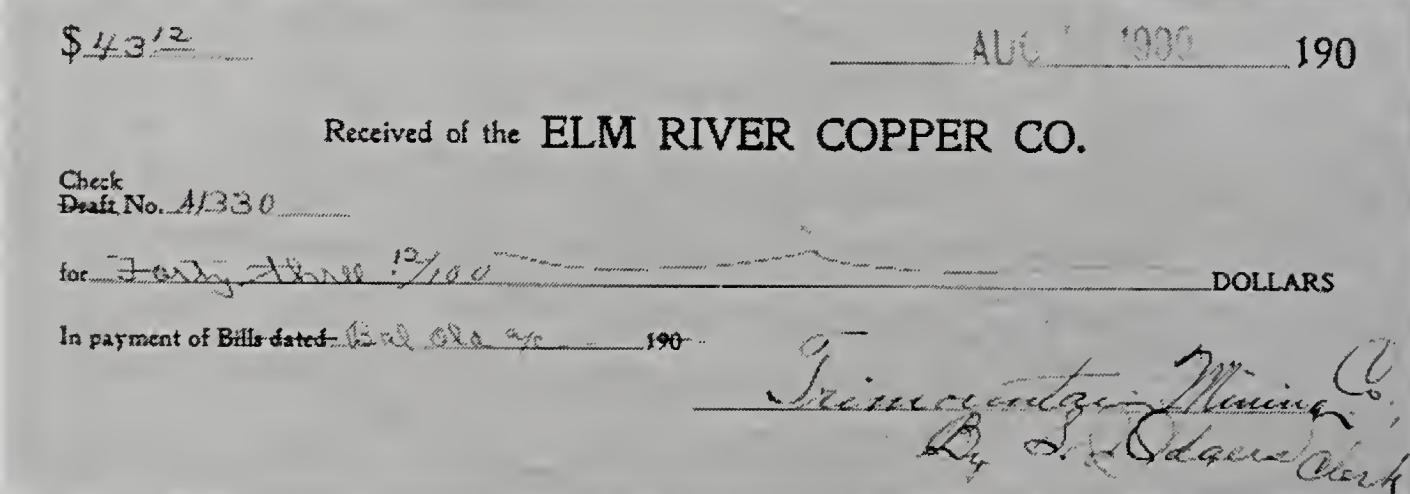

I am interested in collecting any additional note data that anyone can provide. If anyone has data that they would like to share so it can be included in the analysis for Series 2006 \$1 SOI or for Series 2009 \$1 SOI, they can contact Greg McNeal at glmcneal@kingwoodcable.net.

ELM RIVER COPPER CO. – UP NORTH NOTES #4

by: Dave Gelwicks

Wow, what a find to start the new year. How many scrip notes from the Elm River Copper Company have you seen lately, if ever?

Mr. DeGood's book Michigan Copper Mine Stocks and Bonds lists only one known stock certificate with currency scale rarity of 7. I would rate the scrip also at an R-7. The Elm River Copper Company stock certificate is one of the few listed in this book that show incorporation outside of the state of Michigan. Elm River was the town name derived from the river which flowed through large stands of elm trees in the area.

This company was formed in the spring of 1899 as a New Jersey company on 2500 acres of land near Twin Lakes which was 22 miles from the town of Houghton, Michigan. In 1899 this was quite a distance from the main source of business activity but they knew that the Copper Range Railroad would soon be built (1900) to service their freight needs to the water instead of horses upon snowbound dirt roads. \$1,200,000 in capital stock was issued and divided into 100,000 shares of \$12 each. The Elm River Copper Company existed on the Copper Range Railroad leg of tracks with stations at Homestead, Lakewood, Winona, Greenland and Range.

Per the Copper Manual Volume 2 published in 1899 the officers were: H.F. Fay, President and W.B. Mosman, Secretary and Treasurer. Directors included Stephen R. Dow. Like most of these early mines this was financed by investors from the east with a mailing address of 60 State Street, Boston. These same men from Boston were also the officers of the Trimountain and the Mayflower Mining Companies. This group of men organized capital of \$2,500,000 in February, 1899 for Trimountain, \$2,500,000 in May for Mayflower and \$1,200,000 in June for Elm River copper companies. \$6.2 million in 1899 dollars!!!!

The Elm River Copper Company became the Contact Copper Company and eventually was part of the Copper Range Company.

Best of luck wherever your collecting interests take you in 2013.

WANT ADS

Membership in CCCC is \$10 per year which covers the cost of the newsletter of 10 pages that comes out every month. Dr. Nelson Page Aspen, 420 Owen Road, West Chester, PA 19380-4321. PMCM 1228. . CCCC meets each month at 7:00 PM, N.E. corner pf Gay & Adams Streets, Borough Hall, West Chester, PA

Wanted - Counterfeits of Nat'l City Bank of Grand Rapids, \$20 1902 PB. If you don't want to sell send a good scan or report the Charter number used on your piece. I know of three different already. Trade my \$1 FRN's (1963-2006) Contact me for details. dollarsavtr@aol.com Ed Zegers, 17209 Falstaff LN, Olney MD. 20632-2909

ED. NOTE: I have been contacted by a number of folks wondering why we keep the list separated by districts when it is now common practice to send notes to any district needing them, not just to the district they were printed for. If you would like to be listed as a note trader, write me with your address and interests...\$1, \$2, \$5, etc and the Districts you are collecting. For the curlist have kept the names of people I knew to be active. If you want off this list, email me or drop me a line. My Email address is: billbrandimore@charter.net
